Howa Sangyo Co., Ltd.

## Opening of Kansai Logistics Center and Relocation of Osaka Branch

Howa Sangyo Co., Ltd., announces the opening of its Kansai Logistics Center in Fukushima-ku, Osaka, and the relocation of its Osaka Branch to the same location.

The logistics center is an urban logistics facility located within 3.5 km of Osaka Station, with good access to the Hanshin Expressway, Meishin Expressway, Sanyo Expressway, etc., making it a base that can handle deliveries over a wide area. The new large-scale warehouse will enable us to prepare for the large increase in logistics expected in the Western Japan region, and at the same time, establish an even faster and more stable shipping system through the integrated operation of the logistics facility and sales office.

We will continue to build a more efficient logistics system based on this logistics center and the Kanto Logistics Center (Chiba City), which was opened last year, in order to enhance our services to customers.
